9:40 AM CT Weather Forecast

Hour by Hour Forecast:

FORECAST NOTES

Current Weather Alerts:

All Clear

Temperatures:

- ✓ High temperatures will reach in the mid 70s F today near 76 F. With southerly winds the app is at risk of being slightly too mild
- ✓ Low temps tomorrow AM will bottom out in the low 50s F.

Wind/Clouds:

- ✓ Mostly sunny skies in the AM hours will see an increase in cloud cover gradually across the early afternoon
- ✓ Skies will be mostly cloudy towards sunset
- ✓ Sustained SE winds at 7 - 12 mph prior to rain/cold front working in. Behind the front by midnight, winds flip from the NW
- ✓ Gusts of 15 - 20 mph possible in the afternoon. Rain/storms can cause a few gusts to 40 - 45 mph.

Today's Precipitation Chances:

Favoring a dry day with the exception of a late evening cold front. Best timing would move the front through near 8 PM CT through 11 PM. Some lake induced drizzle can occur through 3 AM but favoring dry conditions after 3 AM.

Rain Totals:

Rainfall is favored; however, the coverage can be a bit sloppy. Favoring about 0.2-0.3" locally up to 0.5" possible.

Dew/Frost:

Dew formation not likely as surfaces will already be wet from late evening/early AM rain.

Rainfall Totals Through THU AM

NEXT 5 DAYS: IMPORTANT FORECAST NOTES:

- ✓ **SUN:** Slightly more sun than clouds with dry conditions
- ✓ **MON:** Likely another dry day especially in the AM, It would be near 4 - 7 PM for a low end 20% isolated shower chance
- ✓ **TUE:** A return to an active day. Potential wave of stronger T-storms (severe possible) toward/prior to sunrise. From 8 AM - 4 PM likely far drier than wet, but a part 2 of strong to severe storms possible in the evening
- ✓ **WED:** Majority of this day can be dry, (likely AM through 4 PM best dry time). Another wave enters from the SW in the late PM, but the risk is for this to trend more into THU AM
- ✓ **THU:** Looking like a rainy AM followed by sporadic additional moisture chances in the late evening.

Temperatures:

- ✓ Temperatures cool slightly to start the week SUN/MON behind tonight's cold front
- ✓ Quick return to a milder pattern of mid 70s works through TUE/WED with storm induced warmth
- ✓ Temps again cool slightly into THU/FRI

Clouds:

- ✓ **SUN:** Best day out of the extended 5 days (SUN-THU) to see prolonged sunshine
- ✓ **MON:** sunnier across the AM with partly cloudy afternoon skies
- ✓ **TUE/WED:** 8 - 4 PM would hold the best mix of clouds and sun outside of late PM afternoon heating driven moisture
- ✓ **THU:** some sun can work in between rain chances

Winds:

- ✓ Nothing extreme noted on winds. TUE AM - WED PM would be a window to watch for potential strong to severe gusts under storms. General T-storms can produce 40-45 mph gusts TUE/WED.
