3:30 PM ET Weather Forecast

HOUR BY HOUR FORECAST:

Hazardous Weather Alerts:

All Clear

Current Radar 3:30 PM ET

IMPORTANT FORECAST NOTES (as of 3:25 PM ET, 5/22/24):

- ✓ Shower / storm chances have decreased since the AM report. There is a low end risk for isolated shower / storm chances through 6 PM today (10%). From 6 – 7 PM, the main “front” is expected to move over Pittsburgh, allowing for a slight increase in chances (30%) however we are already seeing signs of these storms struggling to develop leading us to believe shower / storm coverage throughout the evening will remain fairly isolated. We can anticipate a lull in shower chances behind the front leaving drier conditions between 7 – 11 PM. Then, right around 11 PM and then into the early hours of THU AM, we can expect scattered showers and storms to move through producing 0.2-0.5” by sunrise.
- ✓ Temps will sit in the low 80s F by first pitch. After sunset, temps will drop into the low 70s F.
- ✓ Winds will remain out of the SW at 10 – 15 MPH through 7 PM. After 7 PM, winds will shift out of the S and drop to 3-8 MPH, continuing there for the rest of the PM.

Dew Forecast

- ✓ Scattered showers and storms moving over Pittsburgh overnight and into the AM will result in wet surfaces.
