

# MIAMI DOLPHINS

9/12/24 Gameday Weather Forecast

Forecast Made: Wednesday, September 11, 2024

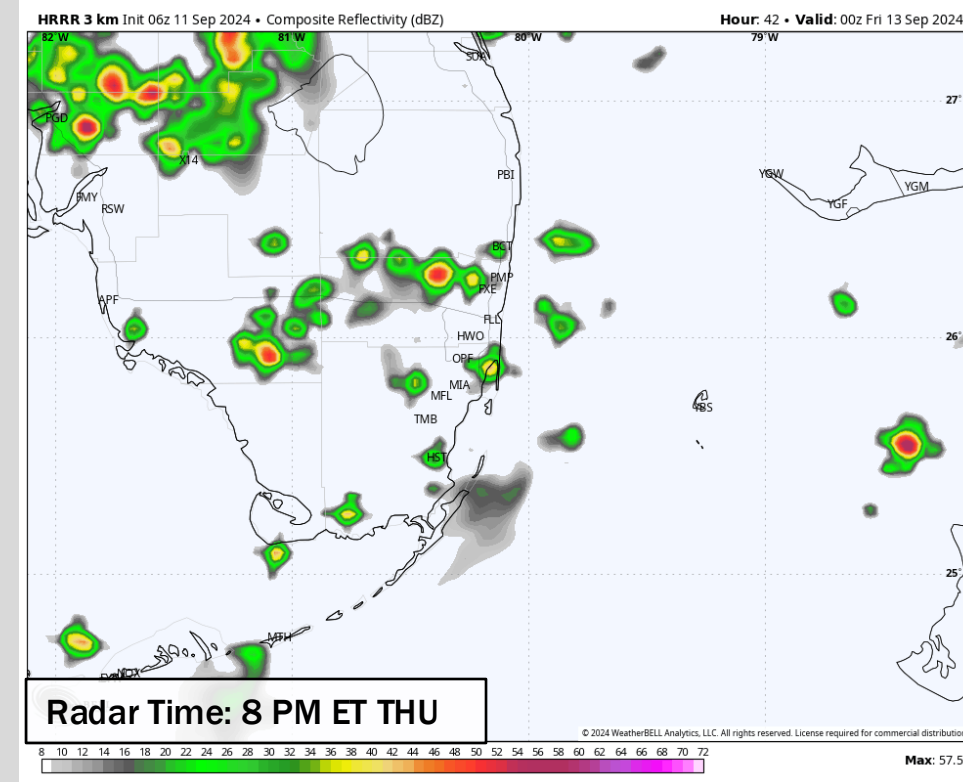

## Forecast Notes for Thursday (9/12/24)

**8 AM - 2 PM:** Mostly dry time favored with a near ~10% chance for showers/storms. Risk for lightning is low but nonzero, especially after 12 PM.

**2-7 PM:** Coverage expected to gradually increase through the afternoon, especially post 3 PM where storm potential increases to near 40% for scattered showers/storms through 7 PM. Lightning will be possible with any cell. Storms will also be capable of torrential downpours and wind gusts of 40+ MPH.

**8 PM - 12 AM:** Coverage/intensity is expected to be on the decrease through the evening. From about 8 - 9 PM chances drop to near 30% before dropping to 20% by 10 - 11 PM. Lightning will be possible (lower end risk) as well as brief heavy downpours. Consistent rain is not expected nor severe weather during this time. Overall chances/intensity will be dropping through the evening.

## Gameday Snapshot

## Temperature Notes
