TIMEFRAME DISCUSSED

THREAT

4 AM – 10 AM THU

Low-End

Patchy fog will be possible for the Bay and Stations N. of Morgan's Point after 4AM, with visibilities expected to drop to 2 – 3 miles. Some pockets of more dense fog may reduce visibilities to 1 mile, but if this occurs will be brief durations only.

6 – 9 AM is the timeframe to watch for the BEST potential to see localized pockets of dense fog form.

Any fog that forms will clear Stations N. of Morgan's Point after 8AM and will gradually clear S. of Morgan's Point by 10AM.

Confidence in this fog threat overall is much below normal.

Houston Pilots Extended Range Visibility Report

Saturday 3/15/25
