THREAT

CURRENT – 2 PM FRI

Medium

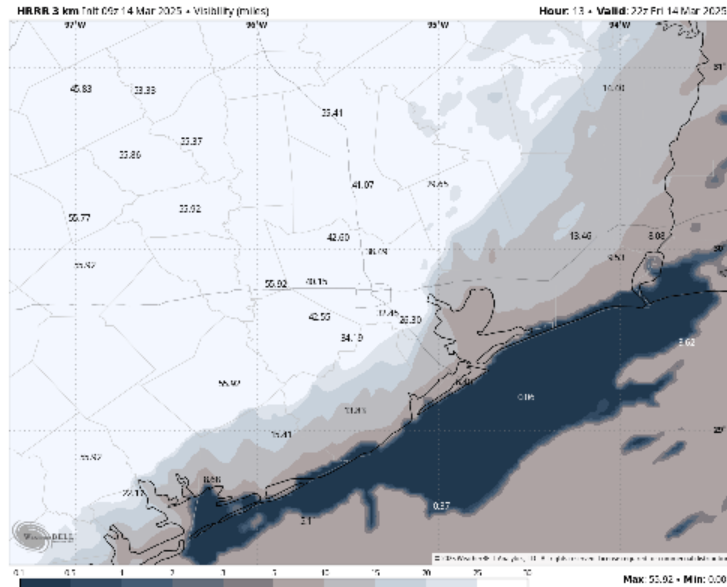

Patchy fog is being noted for stations S of Morgan's Point within the Bay. By 8 AM, coverage will become more widespread towards the Boarding Station and 11/12 with visibility frequently dropping to less than 1 mile.

All stations between Morgan's Point and Station 11/12 will continue to be impacted by patchy dense fog with visibilities dropping to 1 – 2 miles, and at times to less than 1 mile, until 2 PM. Confidence is lower on duration and if there is a risk to this forecast it is that the Bay clears out a couple hour earlier than 2 PM.

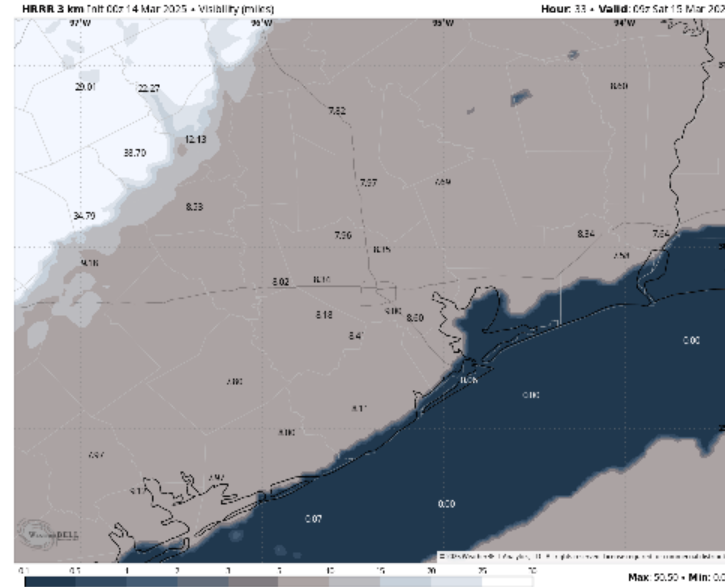

At this time, fairly widespread, dense fog with visibility frequently at 1 mile or less is favored to remain at the Boarding Station and Station 11/12 throughout the entire day. See next slide for FRI PM and SAT AM details.

THREAT

2 PM FRI – 7AM SAT

Medium

Given recent model performance / differences in wind consideration, confidence is lower on coverage and timing beyond 2PM Friday. From 2PM – 8PM, we are favoring widespread, dense fog to be possible for the **Boarding Station and 11/12**. Visibilities of less than 1 mile will be likely at times.

Fog will once again begin to fill into the bay for stations **S of Morgan's Point** after 8PM. At this time, we are favoring this to be more of a patchy risk, but visibilities of less than 1 mile will still be possible.

From 4AM – 7AM on Saturday, any patchy fog lingering in the area will gradually recede from N to S as a front pushes in.
