Houston Pilots Tropical Update

Tropical Storm Melissa Outlook

Updated: 10/22/25

KEY NOTES

- Tropical Storm Melissa is expected to SLOWLY move westward this week and near Jamaica early next week - likely as a major hurricane (large track spread remains, however).
- The trend has been **west** closer to the Bahamas, but the threat for a US landfall remains **very low**. The SE Florida coast should at least monitor for elevated waves if the west track verifies.
