Houston Pilots Visibility Report

From 2AM – 9AM CT, stations N of Station 25/26 will be at risk for dense fog.

This risk will primarily be over Stations N. of Morgan's Point, with widespread reduced visibilities of less than 1 mile.

Patchy instances of dense fog will be in play from Morgan's Point to Station 25/26 with visibilities of 1-2 miles.

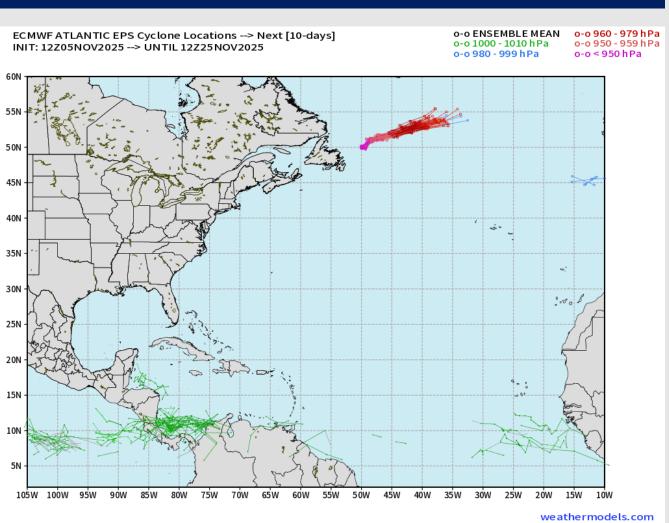

Confidence is lower on exact coverage of reduced visibilities between Morgan's Point and 25/26 due to uncertainty if fog can fully work into the center of the bay for a prolonged period. This should be limited by warmer water temperatures.
