TIMEFRAME DISCUSSED	THREAT
CURRENT – 12 PM WED	Medium - High

Patchy dense fog has formed in the Bay, between Exxon 3 and Station 11/12. Coverage of dense fog with visibilities less than 1 mile will continue to increase through 3AM.

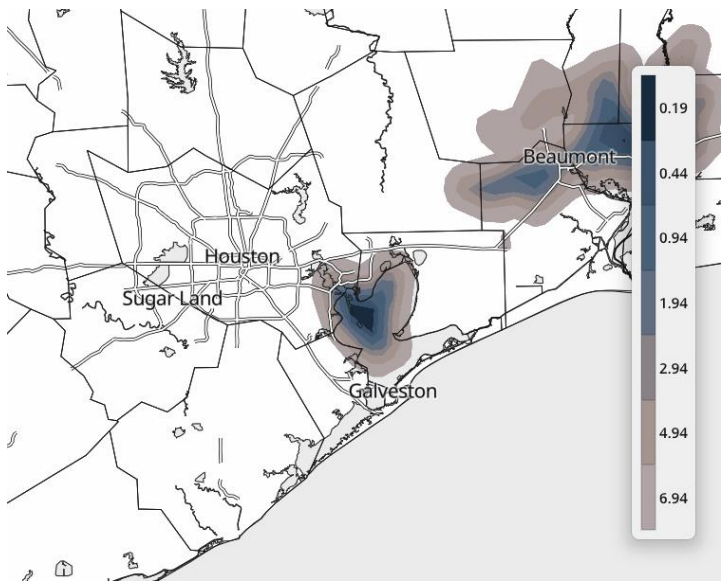

Fog coverage will expand to include all Stations N of Morgan’s Point by 4AM, lasting through 9AM. 4AM – 9AM is the greatest potential for not only widespread fog, but also visibilities to drop less than 1 mile for all Stations N of 11/12.

The Boarding Station will likely remain fog-free for this event given warmer water temperatures.

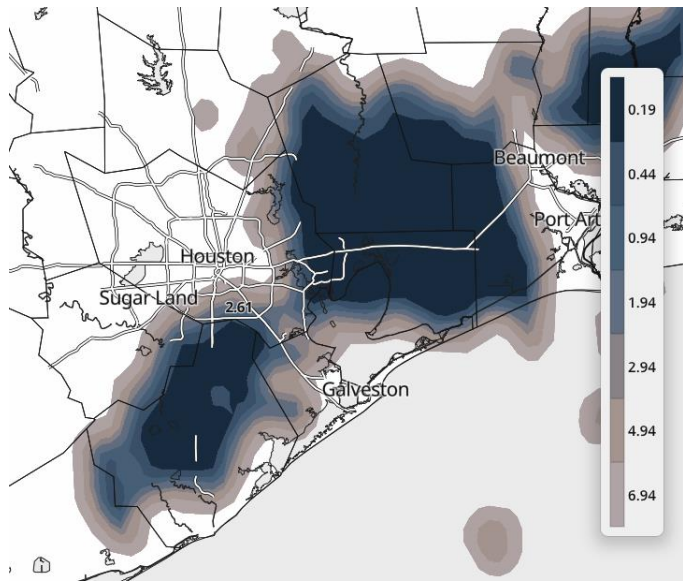

From 9AM through 12PM on Wednesday, sea fog will gradually exit all stations, with very isolated instances of fog after 10AM between Morgan’s Point and Station 25/26.

Confidence

TIMEFRAME DISCUSSED	THREAT
9 PM WED – 11 AM THU	Medium

Confidence in exact timing remains limited, but similar hours are anticipated currently for more fog WED night into THU.

Coverage will initially be secluded to **Stations between Morgan's Point and Station 25/26** and will likely be patchy at first, allowing for visibilities of less than 2 miles to be in play. The Boarding Station will likely remain fog-free.

North of Morgan's Point will be at risk for fog from 4AM to 9AM .Fog in the harbor will also likely become dense as coverage increases, with visibilities of less than 1 mile likely for **all Stations excluding the Boarding Station**.

Fog coverage is anticipated to decrease by 11AM THU.

Houston Pilots Extended Range Visibility Report

Saturday 11/22/25

A low-end risk for fog will be possible Saturday AM, mainly for Stations S of Morgan's Point.

Forecast Confidence
