TIMEFRAME DISCUSSED	THREAT
1 AM THU – 10 AM THU	Medium

Confidence in exact timing remains limited, but we are delaying the start time for when we can see patchy fog impact stations.

Coverage will initially be secluded to Stations N of Morgan's Point and will likely be isolated from 1AM – 4AM, allowing for visibilities of less than 2 miles to be in play.

N of Morgan's Point will be at risk for patchy, dense fog from 4AM to 9AM. Visibilities of less than 1 mile will be in play during this time. Patchy fog can also "spill" S of Morgan's Point towards Stations 11/12. Confidence is lowest on duration / coverage of fog, but visibilities of less than 2 miles will be possible.

Fog coverage is anticipated to decrease between 9 and 10AM THU.
