Confidence

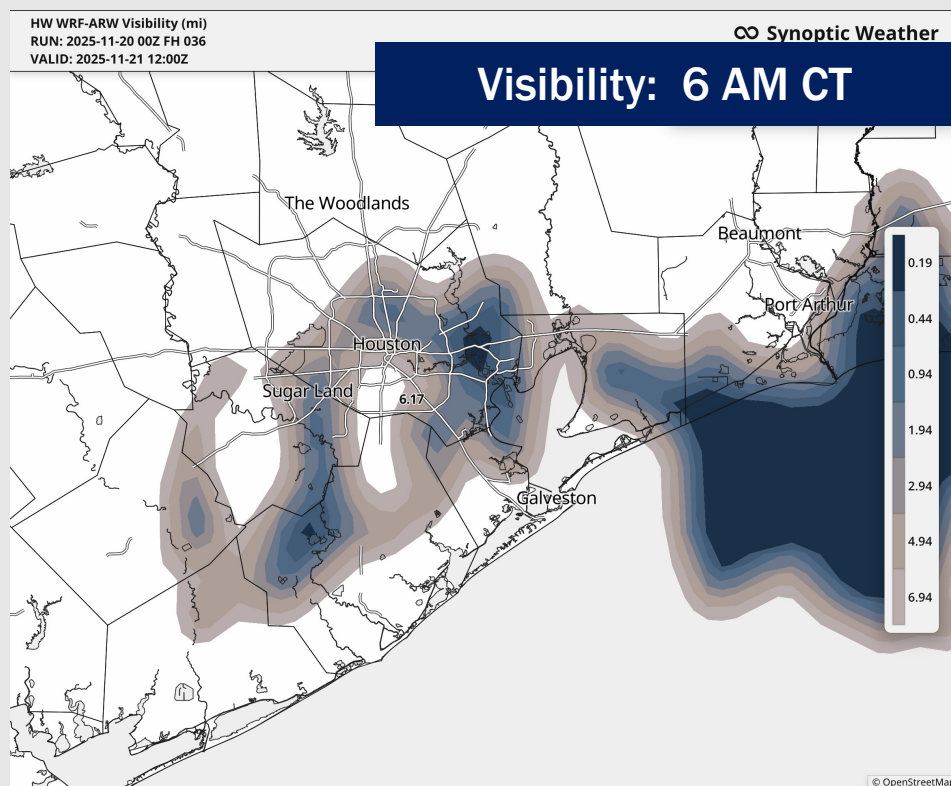

Given latest trends and warmer water temperatures, confidence has increased in thinking this fog event will now be more isolated than originally anticipated.

Isolated fog with visibilities of less than 2 miles will still be possible for **Stations N of Morgan's Point** from 3AM – 9AM before receding. Elevated winds have delayed the original timing on this.

At this time, we do not favor any fog to spill into the bay **S of Morgan's Point** with moderate confidence.

- Patchy fog will be possible for stations **N of Morgan's Point** from 2AM – 10AM on Friday.
- Greater confidence in coverage vs timing.
- We are watching trends for patchy fog to potentially get as far **S as 11/12**, but currently thinking winds will be too strong for this to be a risk for the rest of the bay.
