Houston Pilots Visibility Report

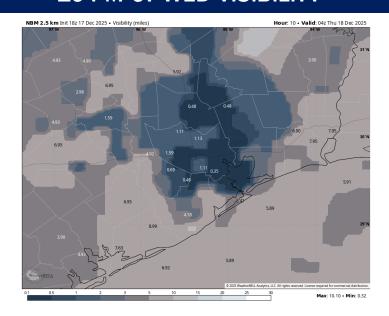

CURRENT VISIBILITY (4:30 PM)

10 PM CT WED VISIBILITY

Confidence

Between Morgans Point and Station 25/26, fog will continue to be risk through 8 PM at times locally dense of less than 1 mile.

Post 8 PM, the concern is fog begins to expand northward to encompass stations N of Morgans Point. Fog risks (visibility of less than 1 mile) linger through the overnight.

Near 4 AM, fog is expected to spread southward back towards the **Boarding Station** (visibility less than 1 mile).

All stations at that point will be at risk for sea fog through 10 AM (visibility less than 1 mile).

After 10 AM, fog is expected to clear out N of Morgan's Point but may linger from Morgan's Point to the Boarding Station through ~12PM.

Confidence remains lower on exactly when fog will be able to clear out, however, fog is expected to become patchier and less dense in nature post 10 AM. The boarding station will be at highest risk during this time.

TIMEFRAME DISCUSSED

Now - 12 PM THU

MED-HIGH

THREAT

Houston Pilots Extended Range Visibility Report

Saturday 12/20/2025

Low-end risk for fog will be possible from 3AM to 9AM, mainly for Stations N of Morgan's Point. Fog will be possible again for all Stations after 8PM.

Sunday 12/21/2025

Fog will be possible for all Stations through 10AM, with fog likely lingering S of Morgan's Point throughout the day.
