Confidence

TIMEFRAME DISCUSSED	THREAT
CURRENT - 1 PM CDT SUN	MEDIUM

Stations N of Morgan's Point: A front is currently sitting over these stations. This will allow for continuous shower chances, keeping isolated fog (visibilities of 2-4 miles) in play from 4AM - 9AM CDT only.

Stations S of Morgan's Point: Patchy fog with visibilities of 1-3 miles likely from 3AM - 12PM CDT. Intermittent breaks of 1-2 hours will be possible for these stations given occasional scattered showers. Localized risks to see visibilities of less than 0.5 miles also possible. Confidence lowest in this zone.

11/12 & Boarding Station: Confidence highest in this zone given current position of showers. Patchy, dense sea fog will be possible from 1AM - 1PM CDT due to water temperatures and winds. Even so, we expect fog to remain patchy, with the risk being an earlier exit thanks to additional storm coverage early Sunday afternoon.
