IMPORTANT FORECAST NOTES

- ✓ Scattered pockets of light to moderate rain will continue to be possible through 3PM. Up to ~0.1" would be the max for totals for this period.
- ✓ For 3PM – 7PM, there is an elevated risk for a pop-up downpour or storm that can work in from the west-southwest. This can result in a couple tenths per cell at most in addition to lightning / gusts of 40mph.
- ✓ After 7PM, we are favoring the risk for pop-ups to steadily decrease as the front shifts more south / we lose daytime heating. A few sprinkles / light showers of up to 0.05" can remain possible through 11PM.

Dew Forecast

Wet ground are likely SUN AM.
