1:25 PM ET Weather Forecast

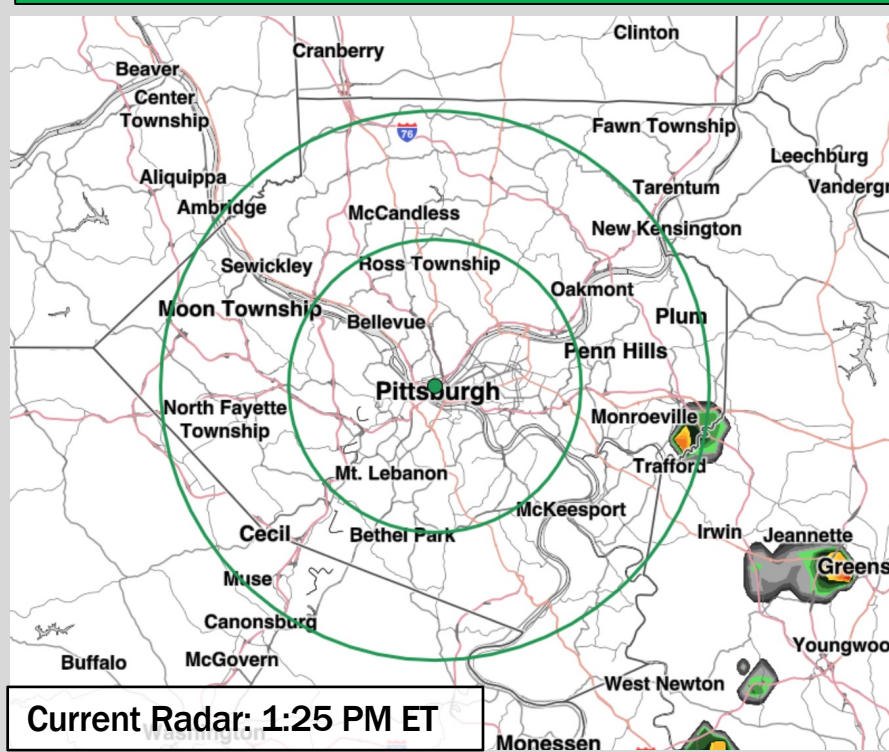

HOUR BY HOUR FORECAST:

Hazardous Weather Alerts:

No Current Alerts

IMPORTANT FORECAST NOTES

- ✓ We continue to believe the main isolated pop-up downpours will situate themselves just SOUTH and EAST of the area this afternoon. A very low-end 20% pop up risk exists now through 10PM but favoring a much better chance to stay dry.
- ✓ Low-mid 70 dew points will allow heat index values to rise into 93 – 94F range this afternoon.
- ✓ A few isolated showers overnight (20 – 30%) mainly after 4AM. Any rain would be very light (<0.05”).

Dew Forecast

Some light dew is possible Thu AM (grounds may also be wet from iso showers).
